

Days Before Surgery

Once your surgery has been scheduled through your surgeon's office, please enter Simple Admit to enter your health, medication, and surgical history along with any relevant information related to your health and medical condition.

If there is a change in your physical condition, like a cold, fever or illness, notify your surgeon before coming to the Surgery Center.

Some tips to remember:

- Call the center between 1-3 the day before your surgery to confirm your exact arrival time and review your instructions.
 - Arrange for responsible adult to drive you to and from the Surgery Center
 - Someone should also be available to stay with you for 24 hours following surgery.
 - If you wear glasses or contacts, be sure to bring along the protective cases for them.
 - Bring any pertinent insurance information and cards with you. This includes Medicare.
-

Please:

No food, drink or water after midnight. You may brush your teeth while taking care not to swallow any water. Remember to follow your pre-operative instructions. Failure to follow these instructions may result in the cancellation of your surgery.
